Education

INDUS INSTITUTE OF TECHNOLOGY AND ENGINEERING, RANCHARDA, GUJARAT
BACHELOR OF TECHNOLOGY IN COMPUTER SCIENCE AND ENGINEERING | 2021 - 2024
CGPA: 8.70 | FGPA: 8.85

L.J. POLYTECHNIC, AHMEDABAD, GUJARAT
DIPLOMA IN COMPUTER ENGINEERING | 2018 - 2021
CGPA: 8.61

LEMONLOGIC INTERACTIVE – JR. GAME DEVELOPER (JAN' 25- MAR' 26)

Sky Vanguard 3D (3D Aerial Combat - Unity URP)

- Core Systems: Developed a responsive flight control system and a modular weapon system supporting multiple projectile types (Homing Missiles, Bombs, Flares).
- Enemy AI: Designed advanced AI behaviors using Unity's AI Navigation and Dreamteck Splines to create specialized dogfight patterns for aerial and ground units.
- Performance & Rendering: Optimized real-time performance via Object Pooling and custom URP shaders (Fog, Blur), ensuring a high-fidelity experience on mobile devices.

Sorting3DGame (3D Casual Puzzle - Unity)

- Mechanics & Interaction: Authored the core "Bead Sort" interaction logic utilizing DOTween for polished, performant animations and satisfying user feedback.
- Progression & Meta: Implemented a comprehensive chapter-based level progression system featuring procedurally generated challenges and a dynamic shop/currency ecosystem.
- Monetization & Analytics: Integrated Unity LevelPlay for advanced monetization management and developed a custom PerformanceManager to track player efficiency and accuracy.
- Quality of Life: Engineered an intelligent hint system and pathfinding-based "Undo" mechanism to enhance player engagement and reduce friction.

DEV INFORMATION TECHNOLOGY – ML INTERN (JAN' 24 - JUNE' 24)

- Developed and Deployed AI/ML Solutions: Improved data extraction accuracy by 30% using RASA chatbots for a mobile application.
- Implemented Regression Models: Developed neural network models using TensorFlow and Keras, achieving ~70% accuracy on high-variance data.
- Conducted Data Visualization: Used Power BI to create actionable insights, aiding stakeholder decision-making.
- Expanded Knowledge in Azure Technologies: Integrated Hugging Face transformers and utilized LLMs like Google's Gemini and OpenAI for advanced text processing.
- Migrated APIs to Azure Functions: Successfully transitioned FastAPI services to Azure Functions for improved scalability.

Programming Languages
Python, C#, C++, C, JavaScript, SQL

AI Tools & LLMs
Prompt Engineering, ChatGPT, Claude, and Cursor AI Editor.

Game Development
Unity Engine, URP, DOTween, Dreamteck Splines, Object Pooling

Machine Learning & Data
TensorFlow, PyTorch, Scikit-learn, Pandas, NumPy, NLTK

Backend & APIs
FastAPI, Flask, Django, REST APIs

Automation & DevOps
Docker, n8n, Cloudflare Tunnel

Databases
SQLite, PostgreSQL, MongoDB, MySQL

Projects

Self hosted automation

- Deployed and maintained a self-hosted automation platform using n8n on a VPS with Docker.
- Configured secure external access using Cloudflare Tunnel, enabling encrypted public endpoints without opening server ports.
- Designed automation workflows for lead generation, web data extraction, and third-party API integrations.
- Integrated Python scripting and HTTP requests to parse, transform, and structure JSON data within automated pipelines.
- Implemented email-based automation triggers using IMAP/SMTP for notifications and workflow execution.
